

Music Coast Coins/Tokens Disclosure

Audience: Users and Artists

Last updated: February 17, 2026

This document is intended to be posted on the Music Coast website and referenced from the Music Coast mobile apps and web app. It summarizes key disclosures and disclaimers for the Service.

1. Scope and key idea

This Coins/Tokens Disclosure applies to the Music Coast Service (musiccoast.com, Music Coast mobile apps, and the Music Coast web app when available).

Coins/tokens ("Tokens") are optional digital items designed to let users support or tip an artist within Music Coast.

- Tokens are not included in subscriptions at launch (Free, Premium, and Family include 0 tokens/coins by default).
- Tokens may be introduced later as an optional add-on purchase (or may remain unavailable).

2. Pricing

If enabled, the target price is approximately \$3.00 USD per token/coin. Final pricing may vary by:

- platform (Apple/Google/web),
- country/region and currency conversion,
- taxes, and
- store rounding and pricing tiers.

We may run promotions, bundles, or different pricing models in the future.

3. Buying and assigning tokens

If tokens are enabled, users may be able to purchase tokens and then assign them to a specific artist as support.

- Once assigned to an artist, the assignment may be treated as final and irreversible (for example, to prevent abuse and chargeback fraud).
- We may set limits (per purchase, per day, per account) and may require additional verification for high-volume activity.

4. No cash value to users; restrictions

Tokens have no cash value to users and are not redeemable by users for cash.

- Tokens are not legal tender, are not a stored-value account, and are not a bank account.
- Tokens are generally non-transferable between users unless Music Coast explicitly enables a gifting feature later.
- Tokens may be removed, suspended, or reversed if we reasonably believe there was fraud, abuse, chargebacks, or a violation of our policies.

5. Refunds, cancellations, and chargebacks

Refund eligibility depends on where the purchase occurred and whether tokens were assigned to an artist.

- If purchased through Apple or Google, refunds are typically handled under that store's rules and processes, except where required by law.
- If tokens have been assigned to an artist, we may treat the purchase as non-refundable (except where required by law).
- Chargebacks, payment disputes, or suspicious activity may result in temporary holds, feature limitations, or account suspension.

6. Artist payout intent (important disclosure)

Tokens are intended to translate into artist support payments. However, token value is not the same as artist payout.

- Artist payouts (if offered) should be calculated as a portion of net proceeds after applicable app store fees, payment processing costs, taxes, refunds, chargebacks, and other service fees.
- Actual payout timing, thresholds, and methods are defined in the Music Coast Creator Monetization Terms (or equivalent creator payout policy).
- Music Coast does not promise that an artist will receive \$3.00 per token/coin; payout amounts may be lower due to the deductions listed above.

7. Changes and discontinuation

Tokens are optional and may change over time. We may modify, suspend, or discontinue tokens at any time to the extent permitted by law.

- We may change token pricing, rules, availability by country, and program eligibility.

- We may limit token purchases in certain regions or on certain platforms due to legal, compliance, or store policy constraints.

8. Contact

Questions about tokens/coins can be directed to Music Coast Support via the contact methods listed on musiccoast.com.
